

Vendia MCP solution: AI-ready data gateway

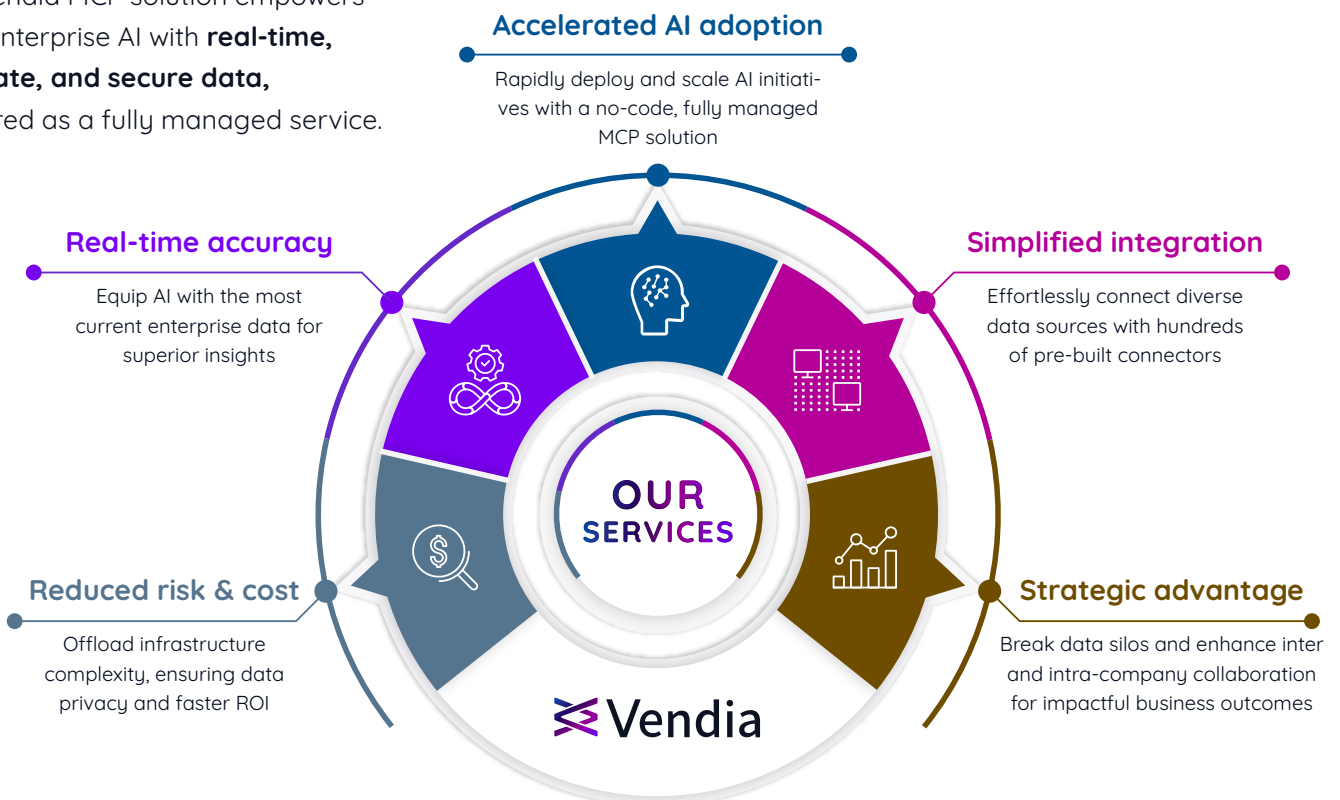

The Vendia MCP solution is a scalable, cloud-native no-code API layer that implements the Model Context Protocol (MCP). Think of it as an AI-ready data gateway – an intelligent bridge providing real-time, secure, and standardized access to your data in Vendia. Fully compliant with MCP specifications, it integrates seamlessly with LLMs like OpenAI, Claude, and Gemini, enabling AI agents and copilots to generate insights from reconciled operational, analytical and files data, and also create and update records—live and securely.

The Vendia MCP solution is fully context-aware, including data across a variety of modalities and partners to ensure AI has the full picture. Fine-grained access controls and sharing policies ensure each AI application only sees what it’s authorized to. Data is automatically available once it is landed in Vendia and table metadata and API schemas provide context to AI to reduce lookup time and improve results.

KEY BENEFITS

AI-ready data, real-time advantage

The Vendia MCP solution empowers your enterprise AI with **real-time, accurate, and secure data**, delivered as a fully managed service.

KEY FEATURES

1 Fully managed MCP solution

- ✔ **Simplified adoption:** Offload the cost and complexity of MCP with a fully managed, no-code solution, enabling rapid enterprise-wide GenAI adoption.
- ✔ **Seamless LLM integration:** Native MCP support ensures future-proof compatibility with OpenAI, Claude, Gemini, and other popular LLMs.
- ✔ **Real-time data access:** Direct connection to live Vendia data eliminates replication, sync delays, and reduces storage costs.
- ✔ **Comprehensive toolset:** AI agents access operational data, analytical data, and files via intuitive graphql API endpoints like query-graphql, query-iceberg-table, and file access.

2 Data harmony & reconciliation

- ✔ **Cross-environment access:** Connects SaaS, cloud, and on-prem data for unified view of your enterprise data.
- ✔ **No Data Duplication:** Direct access to source data within the Vendia platform, reducing complexity and cost.
- ✔ **Multimodal & real-time:** Securely access and analyze multimodal data—operational data, analytical data, and files—across multi-party networks, fostering a real-time “golden record.”

3 Built-in security & compliance

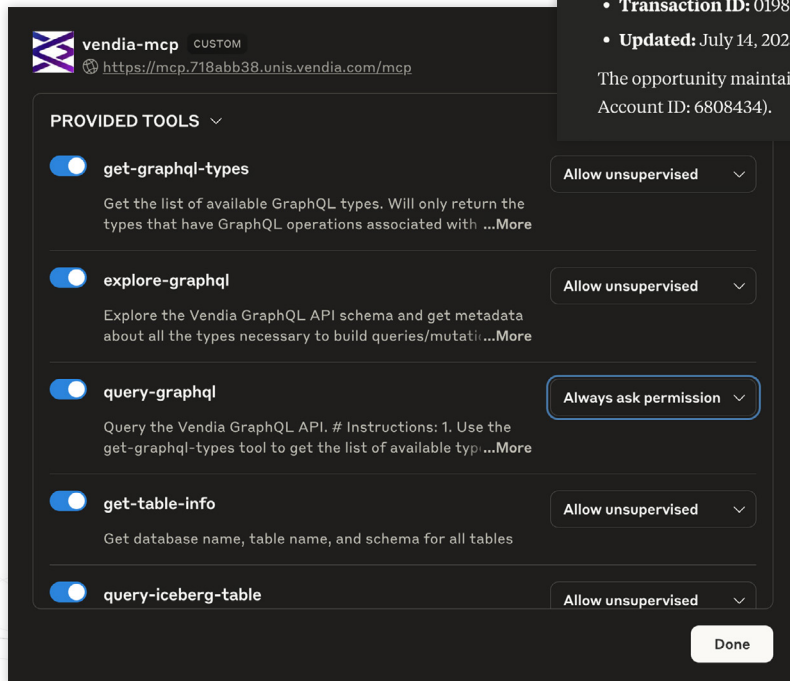

- ✔ **Robust data protection:** Ensures PII, PHI, GDPR, and CCPA compliance with data firewalls.
- ✔ **End-to-end forensics:** Full audit trails and data provenance for enhanced privacy and compliance.
- ✔ **Secure access control:** Standards-based authorization, OAuth2 integration, and fine-grained access policies ensure only authorized AI applications see your data.
- ✔ **Preserved data sovereignty:** Your data stays in your control.

Full audit trails and data provenance of your data

The screenshot shows the 'Analyze' section of the Vendia interface. The main content area displays a table of transactions under the 'Transactions' tab. The table has the following columns: Transaction ID, Block ID, Owner, Action, Entity, Mutation(s), and Creation Time. The data rows are as follows:

Transaction ID	Block ID	Owner	Action	Entity	Mutation(s)	Creation Time
01980b13-5a23-7650-87c9-a07f9fbe32ae	000000000000242	Skybus	update	Opportunity	updateSelf_Opportunity	a minute ago

Done

E update the amount of the Baker-Parker opportunity to 120000

I'll help you update the Baker-Parker opportunity amount to \$120,000. Let me first explore the Opportunity type structure.

explore-graphql

Now I need to find the Baker-Parker opportunity. Let me search for it by name.

query-graphql

Perfect! I found the Baker-Parker opportunity. Now I'll update its amount to 120,000.

query-graphql

Successfully updated Baker-Parker opportunity:

- **Amount changed:** \$1,063,268 → \$120,000
- **Transaction ID:** 01980b13-5a23-7650-87c9-a07f9fbc32ae
- **Updated:** July 14, 2025 at 22:34:34 UTC

The opportunity maintains all other details (Stage: Negotiating, Close Date: 2023-10-27, Account ID: 6808434).

About Vendia

Vendia is the future of collective data intelligence, combining smart APIs, databases, and distributed ledger technology inside a single platform. Vendia's data automation cloud makes it easy to share data inside and outside of the organization in real time and with full visibility, governance, and control. Companies such as BMW, Delta Airlines, Resolution Life Insurance, and Fannie Mae use Vendia to automate contextual and compliant data flows between any-to-any systems for a harmonized, accurate view of data that unlocks speed, innovation, and cost savings. Learn more about us at [Vendia.com](https://vendia.com) and [#UnchainYourData](https://twitter.com/UnchainYourData) with Vendia.
